

# STOP THE BADGER SNARING SLAUGHTER

The Department of Agriculture's TB Eradication Scheme will leave 80,000 badgers dead. A cruel experiment that's been condemned as "slaughter masquerading as science".

Dear Minister Joe Walsh,

I wish to register my outrage at the slaughter of tens of thousands of badgers as part of your Department's so-called TB Eradication Scheme.

As you are aware, no scientific evidence exists to definitively link badgers to the spread of TB. In fact, this cruel experiment has been described by the UK's National Federation of Badger Groups as "slaughter masquerading as science".

Please immediately halt this unnecessary and extremely cruel massacre of badgers.

Yours sincerely,
